

STATE OF MICHIGAN

DEPARTMENT OF COMMUNITY HEALTH
LANSING

JENNIFER M. GRANHOLM
GOVERNOR

JANET OLSZEWSKI
DIRECTOR

January 6, 2004

To Whom It May Concern,

As we are all aware, Health Insurance Portability and Accountability Act of 1996 (HIPAA) was enacted which addressed the sharing of confidential medical information. This has raised questions among a number of physicians about HIPAA requirements and the reporting of confidential data related to communicable diseases and immunization to local health departments. The HIPAA legislation does address this question and states that reporting of Communicable Diseases (including HIV/STD) to the local or state health department or immunizations to the Michigan Childhood Immunization Registry are exempt because they are mandated within the Michigan Public Health Code and are used for surveillance and prevention of communicable diseases. This is addressed in section §164.512(b) of the HIPAA regulations. The relevant sections of the Michigan Public Health Code and Administrative Rules are:

Sec. 333.5111 (1) b – Requirements for reporting communicable and serious communicable diseases
R 325.173 – Administrative rules detailing the reporting of communicable and serious communicable diseases

Sec. 33.9207 – Establishment of the Michigan Childhood Immunization Registry R.325.163 – Administrative rules requiring the reporting of immunizations administered to children to the Department.

Physicians and hospital staff who are concerned about reporting communicable diseases and immunizations as required under the Michigan Public Health Code can be reassured that this is permitted under HIPAA and that they are not required to obtain patient written consent before sending this information to the local health department.

Sincerely,

Gerald A. Goza, M.S.
Manager, HIV/STD and Other Bloodborne Infections
